TO	FROM	SUBJECT
[Investor Name]	**Ram Ganesh Makina, Founder & CEO**	**Seed Investment: ₹5.5 Lakh for 10% Equity**

At a Glance

INVESTMENT ASK	90-DAY UNIT TARGET
₹5.5 Lakh	**330 Units**
for 10% equity, ₹55 Lakh post-money	Visakhapatnam launch
EST. CONTRIBUTION / UNIT	**BREAK-EVEN**
₹5,780	**96 Units**
before NBFC fees and returns	₹5.5L ÷ ₹5,780

Concept renders (product-only crop and design sketch), not photographs of a manufactured unit.

1. Product

A dual-ion RO water purifier with a transparent body, so customers can see the copper coil and the silver-ion chamber. It features **15-stage Dual-Ion filtration** (RO membrane, copper and silver cartridges, carbon and sediment filtration, mineral conditioning), **hands-free IR auto-fill**, and a smart display with live TDS readings and filter-status alerts. The final cartridge sequence is to be confirmed in the engineering bill of materials.

2. Business Model & Growth Plan

Customer payment: ₹4,999 upfront plus ₹999 a month for 12 months through Bajaj Finance. The total is ₹16,987 and includes finance charges, so it is not a zero-cost EMI.

Unit economics: The plan assumes Bajaj disburses about ₹16,480 within three days of delivery. Against an estimated unit cost of ₹10,700, that gives ₹5,780 per unit before NBFC fees, subvention and returns. Written confirmation of the disbursal amount, fees, chargeback and recourse terms is pending.

Referral ("5 Ka Dum"): When a referred friend buys, both families receive ₹2 lakh family health cover for one year. Target acquisition cost is ₹200 per referral, an assumption that depends on the insurer's premium quote.

3. Investor Contribution & Returns

Scenario	Units	Company gross contribution	10% share (gross basis)
Break-even	96	₹5,54,880	₹55,488
Half of plan	165	₹9,53,700	₹95,370
90-day plan	330	₹19,07,400	₹1,90,740

> **Financial clarification.** The ₹19.07 lakh is the company's gross contribution (330 units × ₹5,780) before tax, finance fees and returns. It is not a cash payout to the investor. After the full ₹5.5 lakh spend it is about ₹13.57 lakh, so a 10% shareholder's proportionate share is roughly ₹1.36 to ₹1.91 lakh, or 0.25 to 0.35 times the ₹5.5 lakh invested.

The investment case rests on equity value, not 90-day cash. The plan assumes a follow-on raise of ₹50 lakh at a ₹5 crore valuation after 330 units and BIS. At that valuation 10% would be worth ₹50 lakh before dilution (about 9 times the investment). This is an aspiration, not a forecast.

4. Setup & Initial Budget (₹5,50,000)

Category / Item	Amount (₹)	Purpose
A. One-time setup & legal	**1,37,000**	**Legal, IP and certification**
Private Limited registration	12,000	Company incorporation
BIS certification	65,000	Cost, timeline and whether mandatory for this product: to be confirmed
NABL lab test reports	18,000	Copper and silver ppm test report
Trademark registration	9,000	Brand protection
Legal opinion (insurance / IRDAI)	15,000	Referral insurance model; scope and fee to be confirmed
NBFC / DSA onboarding fee	10,000	Bajaj Finance / TVS Credit tie-up
Website & domain	8,000	Online presence
B. Product & prototype	**1,16,000**	**Working units for live demos**
Final prototype R&D (2 units)	24,000	Final mould and PCB
Demo inventory (10 units)	82,000	₹8,200 per unit for apartment demos
Packaging & manual design	10,000	Box and user manual
C. 90-day operations	**2,79,000**	**Team, facility and field marketing**
Facility rent (3 months)	36,000	300 sq ft office and godown, Visakhapatnam
Technical & sales staff	1,05,000	1 technician ₹20k + 1 sales lead ₹15k per month
Utilities & digital ads	54,000	Electricity ₹9,000 + digital marketing ₹45,000
Society demos & transport	84,000	Demos, banners and TDS kits ₹60,000 + installation and travel ₹24,000
D. Contingency buffer	**18,000**	**Emergency reserve**
TOTAL SEED ASK	**5,50,000**	**10% equity**

5. Working Capital & First Batch

The first 100 units cost ₹10.7 lakh at ₹10,700 per unit. Customer advances of ₹4,999 per unit bring in ₹4.99 lakh, leaving a gap of about ₹5.71 lakh until Bajaj pays out. **This gap is not yet funded.** The ₹5.5 lakh budget does not cover it (the buffer is ₹18,000). Options are OEM payment terms, supplier credit or additional bridge funding, and the choice must be confirmed before production starts. For all 330 units, cost is about ₹35.3 lakh against ₹16.5 lakh of advances.

6. 90-Day Roadmap

Timeline	Deliverables	Assumption to validate
Days 1–30	Register Pvt Ltd, apply for BIS, build 2 prototypes, get NABL lab report	BIS timeline and whether certification is required before sale
Days 31–60	Deploy 10 demo units, run 10 society demos, target 150 advance orders (₹7.5 lakh)	Needs 15 orders per demo; the 5-demo test (30 orders) implies 6 per demo, or about 60 orders from 10 demos
Days 61–90	Activate NBFC financing, fulfil 180 more orders (330 in total)	NBFC payout speed and chargeback rates; units needing BIS are sold only after certification

7. Pending Verification Checklist

Item	Current status	Next step
Bajaj / NBFC terms	₹16,480 payout is projected, not confirmed	Get a written term sheet covering disbursal, fees, chargebacks and recourse
Insurance referral	IRDAI position and premium unconfirmed	Legal opinion and insurer quote; do not use insurer names or logos before an agreement
BIS certification	Cost, timeline and requirement unconfirmed	Confirm scope, whether mandatory, lab schedule and fees
Unit cost	Three figures in use: ₹5,300 (DPR), ₹8,200 (batch), ₹10,700 (this note)	One OEM-quoted bill of materials; ₹10,700 is used as the most conservative
Demo conversion	6 to 15 orders per demo assumed	Record real orders across the first 5 demos
Working-capital gap	About ₹5.71 lakh on the first 100 units, unfunded	Agree OEM terms, supplier credit or bridge funding
Marketing claims	Purity and health claims not yet substantiated	Back every copper, silver and purity claim with lab reports
Follow-on valuation	₹5 crore is an assumption	Treat as a goal that depends on achieving 330 units

> **Founder commitment.** The founder takes no salary until the company reaches ₹1 crore in cumulative revenue.
